*Lokal map of the area visited.* The area is covered by R. A. F.'s aeronautical maps Nos. 340, 427 and 428.

Thus during my approx. four months stay in Iraqi Kurdistan I did not, as planned, stay among Europeans at the Danish Dokan Expedition's camp with daily, but isolated visits to Kurdish villages, but lived almost uninterruptedly in Kurdish homes. This greatly facilitated the work of the woman interpreter, who would hardly have secured her family's permission to live permanently in an European excavation camp among foreign men even though another woman was present. In addition to the opportunity to follow the life of the village, I also had the chance to study life in an urban environment. In addition, my interpreter, besides being of invaluable assistance in my work of investigating the lives

majority of the population are Khanaqin, Kifri, Koi Sanjaq, Ruwandiz, Aqra, Amadiya, Dohuk and Zakho. Kirkuk city is very mixed but contains a large Kurdish element. The professional and intellectual classes, as well as the larger land-owners, tend, as would be expected, to collect in the towns, and there is always a steady drift of these out of Kurdistan to Baghdad.

The rural element consists for the most part of settled villagers; the nomads, once numerous, now form only a small proportion of the whole. Though not all villagers are in fact tribesmen, the organization of society outside the towns may be said, for all practical purposes, still to be essentially tribal, with groups of villages owing a kind of feudal allegiance to a landlord, a Shaykh of one of the dervish fraternities, or a tribal Agha who may have imposed himself on the village by force. With the progressive consolidation of the authority of the administration, and with the spread of education, the villagers have not unnaturally begun to refuse to submit to the impositions, sanctioned by ancient custom perhaps but not enforceable at law, by which these barons, especially the Aghas having no title to the land, were accustomed to maintain their position. In many parts of the country the old social organization is breaking down.

## II.

The south-western boundary of Iraqi Kurdistan runs for most of its length across the plain. But immediately to the north-east of the line the ground begins to rise, first as a maze of foothills, and then in a series of long, parallel, limestone ridges running from south-east to north-west, each loftier than the last, up to the main chain of Zagros, which over much of its length marks the Persian frontier. In the extreme north-west these ranges merge into the eastern extension of the Taurus system. On the Persian frontier there are many peaks of over 10,000 feet. It follows that there is a great variety of climatic conditions. The country is traversed by three important affluents of the Tigris, the Great Zab from Turkey, and the Little Zab and the Sirwan (Diyala) from Persia.

A railway from Baghdad following closely the line of the old high road through Kifri and Kirkuk to Arbil serves Kurdistan south of the Great Zab; the main line up the right bank of the Tigris links Mosul directly with Baghdad and, as already mentioned, skirts the Kurdish districts of the extreme north-west. Most of the market towns are now accessible by automobile. Transportation in the remoter highlands and between villages is by mule and donkey; oxen are still used by the nomads as beasts of burden.
